Polymers... beyond imagination

High Performance Surface coatings

ANTICOR CRC

Product description
ANTICOR-CRC is a SINGLE-PACK, chemical resistant, high performance GRAFTED COPOLYMER based finish coat which should be applied to the substrates needing resistance to corrosive chemicals in varied climatic conditions.

Product Highlights
✈ Excellent Chemical Resistant
✈ Excellent Corrosion Resistant
✈ Quick Drying
✈ Excellent Resistance to Abrasion
✈ Excellent Resistance to Oils at elevated temperatures.
✈ Excellent Outdoor Stability

Recommended use
A specialty formulation specifically designed for use in chemical prone zone. To be used on alone or in combination with various systems which offers excellent corrosion protection from corrosive chemicals in varied climatic conditions.

Film thickness and spreading rate
Film thickness, dry (µm) (DFT) 35 –40 Microns per coat (Rec. 2 Coats)
Theoretical spreading rate (m²/l) 5.5-6 per coat

Physical properties
Color - As per standard RAL and IS shades
Solids (vol %) - 35 ±5
Flash point - >25°C
VOC - 220 gm. per ltr USA-EPA Method 24
High Performance Surface coatings

Surface preparation

All surfaces should be clean, dry and free from contamination. The surface should be assessed and treated in accordance with ISO 8504. Bare steel Cleanliness: Blast-cleaning to Sa 2½ (ISO-8501-1:2007). Power tool cleaning to min. St 2 (ISO 8501-1:2007) may be acceptable, subject to exposure conditions. Blast Cleaning should be done after solvent wipe (SSPC SP1) to ensure removal of all dust, dirt, oil, grease, etc.

Surface Conditions

Temperature of the substrate– Minimum 3°C above the dew point of the air temperature
Relative humidity – Maximum 50 % measured in the vicinity of the substrate.
Ventilation - Good ventilation is required in confined areas to ensure proper drying.
Do not use heated air until the solvents (Thinner) have evaporated (flashed off) from the paint film to avoid surface drying and solvent entrapment. During application and the initial drying of the coating, the object should not be exposed to high humidity as this can result in loss of gloss.

Application methods

Spray -Use Airless Spray or Air Assisted Spray
Brush- Recommended for stripe coating and small areas, care must be taken to achieve the specified dry film thickness.

Roller- May be used for small areas, however when using roller application care must be taken to apply sufficient material in order to achieve the specified dry film thickness.

Application data
Mixing ratio - Single Pack System. (No Mixing of Two Components)
Pot life - Not Applicable. No Pot Life (Can be used for six months after opening the Container)
Viscosity if needed can be adjusted with special solvent THINNER SK13

Guiding data Airless Spray
Pressure at nozzle - 15 MPa (150 kg/cm², 2100 psi)
Nozzle tip - 0.43-0.79 mm (0.017-0.031”) Suitable
Spray angle - 40-80°
Filter Check to ensure that filters are clean.

Drying time
Drying times are generally related to air circulation, temperature, film thickness and number of coats, and will be affected correspondingly. The figures given in the table are typical with: * Good ventilation (Outdoor exposure or free circulation of air) *

Typical paint system
Inside Walls of Transformer tanks
ANTICOR-CRC - 2 x 40 µm (Dry Film Thickness)
Add special THINNER SK-13 to reduce the viscosity for Air Assisted spray application.
Other systems may be specified, depending on area of use

Storage
The product must be stored in accordance with national regulations. Storage conditions are to keep the containers in a dry, cool, well ventilated space and away from source of heat and ignition. Containers must be kept tightly closed.

Best Use Time
If stored below 25°C in the recommended condition, the product remains usable for 12 months.

Handling the Containers
Handle with care. Stir well before use.

Packing size
20 liters Metal Containers
High Performance Surface coatings

Health and safety
Please observe the precautionary notices displayed on the container & in our MSDS. Use under well ventilated conditions. Do not breathe or inhale mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately. For detailed information on the health and safety hazards and precautions for use of this product, we refer to the Material Safety Data Sheet.

Disclaimer
The information in this data sheet is given to the best of our knowledge based on laboratory testing and practical experience. However, as the product can be used under conditions beyond our control, we can only guarantee the quality of the product itself. We also reserve the right to change the given data without notice. Minor product variations may be implemented in order to comply with local requirements.
